

The Essentials

for Today's Provider

A critical first step for small business owners is to create an efficiently run environment that easily facilitates productivity, which is extremely important to maximizing profits and enhancing the quality of work. Those offices that do not keep on top of modern technology often struggle to compete in the digital marketplace.

Get Connected

Today's offices are placing greater demands on their networks than ever before-requiring support for real-time communications for data-intensive applications and any time-and- any- where access to information.

Utilizing a well constructed wireless network lets employees easily move about the office as necessary with a wealth of knowledge – right at their fingertips!

- Wireless Router
- Access Point
- Network Security Firewall Appliance
- Ethernet Switch (LAN deployment)

The PC Experience

Sleek and powerful PCs make offices look and feel more modern and professional.

Using outdated PC technologies puts limits on growth for innovation and expandable knowledge. Don't let the competition beat you because you are being held back by your primitive technology.

PCs with advanced component integration seamlessly accommodates even the most strenuous multitasking, protecting both your productivity and your bottom-line.

- All-in-One PC
- Small Form Factor Desktop PC/ HD Monitor
- Mobile Devices
Notebook - Tablet - Ultrabook

Smooth Operations

Utilizing office equipment that can be integrated with applications such as desktop software and networking solutions can further increase productivity within your organization.

Clerical/front desk technologies are a necessity for clear communication, record keeping, billing, payroll and confidentiality. Without these updated technologies, your business runs the risk of being noncompliant with laws such as HIPPA.

- Multifunction/All-in-One Printers
- VoIP Communications
- Document Management Software
- Productivity Suite Software

COMMUNICATIONS | DESKTOPS | DIGITALCAMERAS | DIGITAL SIGNAGE | DISPLAYS | NOTEBOOKS | MOBILE | NETWORKING | OFFICE | PERIPHERALS

IT Solutions For Your Business Needs

POWER PROTECTION | PROJECTORS | SECURITY | SERVERS | SMARTPHONES | SOFTWARE | STORAGE | SURVEILLANCE | TABLETS | VOIP

The Essentials

for Today's Small Office

Protect Your Investment:

Backing up your business in more ways than one.

Any disruption in your electric service, such as a blackout, brownout, dropout, spike or surge is not only annoying to your productivity, but also potentially harmful to your office equipment.

Save money by protecting your valuable equipment and using battery back up so none of your time and money will ever be wasted again.

- UPS (Uninterrupted Power Supply)
- PDU (Power Distribution Unit)
- Surge Suppressor

Given the prevalence of online threats, physical theft, malicious virus attacks and spam emails, you need a reliable first line of defense.

Protect your equipment, critical data, information and files – avoiding intrusions, saving money and maintaining peace of mind.

- Firewall
- VPN Authentication Appliances
- Data Encryption
- Anti-virus Software
- Surveillance Video Solutions

So what's the Bottom line?

Equipping your office with these updated machines and technologies ensures

- **Increased productivity**
- **Enhanced communications**
- **Sound organization**
